

Eduroam on Android

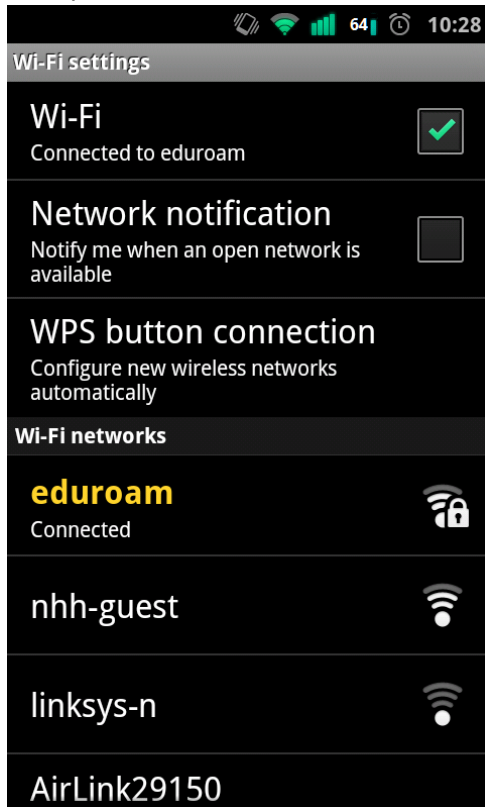

1. From the settings menu, choose “Wireless and Networks”, then choose “WiFi Settings”. Choose “eduroam” from the list of available networks, and “Connect to network”

2. From the “EAP method” option, choose “PEAP”. And from the “Phase 2 Authentication” options, choose “MSCHAPV2”. In the “Identity” field, enter your NHH username followed by @stud.nhh.no, e.g s123456@stud.nhh.no. In the wireless password field, enter your NHH password. Now click the “Connect” button.

3. Your phone should now be connected to the Eduroam.

4. Troubleshooting; if you cannot connect, tap “Eduroam” and tap “Forget network”, restart the phone and try again from step 1.
