RADY SCHOOL OF MANAGEMENT

Rady School of Management was founded in 2003 and created as a shared vision by local science and technology leaders with the goal of enhancing the vitality of the strong regional economy. The Rady School was named after local businessman Ernest Rady thanks to a generous \$100 million gift. Rady has been deeply involved in the San Diego community since moving to the city with his family in 1966. He is a member of UC San Diego's Chancellor's Associates; serves as a trustee of the Salk Institute for Biological Sciences and the Scripps Foundation for Medicine and Science; and is past chairman of the Children's Hospital and Health Center of San Diego.

Rady impacts the business community through cutting edge research, top quality student education, and centers of excellence that combine faculty expertise, practitioner knowledge, and

experiential learning opportunities for students. We experiment and test business ideas from every angle. Our programs are intensely hands-on, innovation-focused, and inspired by the cutting-edge research of our faculty. We use analytical tools to solve business problems, whether in management, strategy, or product development and marketing. We'll take your quantitative and analytical skills to a new level, so you'll become a leader with a better kind of business brain—ready to create the essential bridges between science, data, and innovation.

The Rady School is committed to attracting, welcoming and engaging all local and international populations. The San Diego community gains from the intellectual stimulation, cultural enrichment, social commitment and global understanding of diverse populations.

FAIR Centre for Experimental Research on Fairness, Inequality and Rationality

Centre for Experimental Research on Fairness, Inequality and Rationality (FAIR) aims to be a hub in Europe for research on fairness, inequality and rationality through the collaboration between the Centre for Empirical Labour Economics (CELE) and The Choice Lab (TCL).

Founded in 2017, the centre is managed by a scientific coordination group; director Bertil Tungodden, deputy directors Alexander Wright Cappelen and Kjell Gunnar Salvanes, four principal investigators Ingvild Almås, Sandra E. Black, Katrine Vellesen Løken and Erik Øiolf Sørensen, and the leader of FAIR Insight Team Kjetil Bjorvatn.

FAIR aims to conduct groundbreaking experimental research on how to address inequality in society through research on the multiple aspects of empirical labor economics: the labor market, education and health economics, in particular early investments and intergenerational mobility. But also using economic experiments to study individual decision making, in particular how people are motivated by moral, risk and institutional considerations.

FAIR consists of over 60 members including scientific coordination group, faculty, visiting professors, leading collaborators, PhD students, administrative staff and affiliated researchers, in addition to many short and long time guest researchers.

NHH Norwegian School of Economics is the host institution of FAIR and is one of the leading business schools in Europe. NHH has an internationally recognised research environment and is the first choice for students who want to study business administration in Norway. In close cooperation with the business community and society, NHH is developing new knowledge and creating values for a sustainable future. FAIR represents a critical step for the long-term development of excellent research at NHH. FAIR is situated at the Department of Economics at NHH and was established as a Centre of Excellence (CoE) in 2017 with funding from The Research Council of Norway.

Program

UC San Diego
FAIR

Sunday 23.10

05.00 PM Welcome reception

Monday 24.10

08.45 AM Welcome
