| Parallel sessions 6 Saturday 3 September 2016 09.30-11.00 |   |  |                                    |                               |   |
|---|---|--|------------------------------------|-------------------------------|---|
|   |   |  | Coordination II Simon Siegenthaler | New York University Abu Dhabi | AUD. Jan Mossin Social change and the conformity trap |
|   |   |  | Lian Xue                           | University of East Anglia     | The effect of joint endowment of tacit bargaining     |
| Elaii Ade   | Chiversity of East / Might              | Costly but promising green growth. An experimental comparison of   |                                    |                               |   |
| Eline van der Hejiden                                     | Tilburg University                      | coordination through communication, commitment and leadership  |                                    |                               |   |
| Anna Lou Abatayo  | University of Copenhagen                | Can welfare improving regulations be crowded in?   |                                    |                               |   |
|   |   |  |                                    |                               |   |
| Development: Households II                                |   | AUD. Fin Kydland   |                                    |                               |   |
| Yonas Alem  | University of Gothenburg                | Decision-making within the household: the role of preference difference and autonomy   |                                    |                               |   |
| Kjetil Bjorvatn   | Norwegian School of Economics           | Endowment heterogeneity and cooperation among spouses: experimental evidence from Ethiopia   |                                    |                               |   |
| Mahnaz Nazneen  | University of Warwick                   | Gender roles and bargaining behaviour: a lab experiment in Bangladesh  |                                    |                               |   |
|   | School of Economics, University of Cape | Risk attitudes and adaptation: experimental evidence from a flood-prone urban  |                                    |                               |   |
| Martine Visser  | Town                                    | informal settlement in South Africa  |                                    |                               |   |
| Risk & Psychology AUD. Terje Hansen                       |   |  |                                    |                               |   |
| Zhuoqiong Chen  | London School of Economics              | Persistent bias in advice-giving   |                                    |                               |   |
| Adriana Breaban   | Tilburg University                      | Emotional correlates of higher order risk attitudes  |                                    |                               |   |
| Davide Marchiori  | University of Southern Denmark          | Gambling addicts exhibit the standard patterns of experiential learning  |                                    |                               |   |
| Sheen S. Levine   | University of Texas, Dallas             | Should I stay or should I go? The cognition of exploration and exploitation  |                                    |                               |   |
|   |   |  |                                    |                               |   |
| Public Goods III  |   | AUD. D   |                                    |                               |   |
|   |   | Crowd out or crowd in: an experimental study on the impact of decentralized  |                                    |                               |   |
|   |   | punishment on the effectiveness of centralized sanctions in a public goods   |                                    |                               |   |
| Xue Xu  | Tilburg University CentER               | game   |                                    |                               |   |
| Alexis Belianin   | and Finance, Higher School of Economics | Crime without punishment: an experimental study of nature and causes of punishment in public goods games   |                                    |                               |   |
|   |   | When kindness generates unkindness. Why positive framing cannot solve the  |                                    |                               |   |
| Kjell Arne Brekke   | University of Oslo                      | tragedy of the commons, an experimental investigation.   |                                    |                               |   |
| Ozan Isler  | University of Nottingham                | Abstract, concrete and loaded framing of the public good game  |                                    |                               |   |
|   |   |  |                                    |                               |   |
| Teams & Games   | Turk is en la li                        | Aud. 21  |                                    |                               |   |
| Katarina Dankova  | University of East Anglia               | It's all fun and games: using game design elements to generate effort  Is ignorance bliss? An experimental study of the effects of diversity on team |                                    |                               |   |
| Brian McCall  | University of Michigan                  | performance when members are ignorant of their team's diversity  |                                    |                               |   |
| Sebastian Schaube   | University of Bonn                      | Peer evaluation and compensation schemes in a real effort experiment   |                                    |                               |   |
| Michalis Drouvelis  | University of Birmingham                | Prosociality spillovers of working in groups   |                                    |                               |   |
|   |   |  |                                    |                               |   |
| Dishonesty III  |   | AUD. 22  |                                    |                               |   |
| Sascha Behnk  | University of Zurich                    | Understanding diffusion of responsibility in anti-social behavior  |                                    |                               |   |
| Justin Buffat   | University of Cologne                   | Bribery, centralized sanctioning and cooperation in public good games  |                                    |                               |   |
| Nadine Chlass   | University of Turku                     | Lying, spying, sabotaging - procedures and consequences  |                                    |                               |   |
| Marie-Claire Villeval                                     | GATE (CNRS-University Lyon)             | Asymmetric lies?   |                                    |                               |   |
|   |   |  |                                    |                               |   |
| Fairness & Inequality II                                  |   | AUD. 23  |                                    |                               |   |
| Cionluga Crimal I   | lauma I I Iniversity                    | Preferences for redistribution in the US, Italy, Germany, and Norway: an   |                                    |                               |   |
| Gianluca Grimalda   | Jaume I University                      | experimental study Cutthroat capitalism versus cuddly socialism: Are Americans more meritocratic   |                                    |                               |   |
| Bertil Tungodden  | Norwegian School of Economics           | and efficiency-seeking than Scandinavians?   |                                    |                               |   |
| Daniel Müller   | University of Mannheim                  | The anatomy of distributional preferences with group identity  |                                    |                               |   |
|   | University of Granada & Middlesex       |  |                                    |                               |   |
| Natalia Jimenez   | University                              | Work productivity versus Income redistribution in a voting experiment  |                                    |                               |   |
|   |   |  |                                    |                               |   |
| Generosity & Charitable                                   | Research Institute of Industrial        | AUD. 24  |                                    |                               |   |
| Ola Andersson   | Economics (IFN)                         | Subliminal influence on generosity   |                                    |                               |   |
|   |   | Save the planet or close your eyes? Environmentally friendly behaviour,  |                                    |                               |   |
| Anna Pauls  | University of Oslo                      | uncertainty and social interaction   |                                    |                               |   |
| Arianna Galliera  | LUISS Guido Carli                       | Experiments on conditional generosity  |                                    |                               |   |
| Sigve Tjøtta  | University of Bergen                    | You'll never walk alone. An experimental study on receiving money  |                                    |                               |   |
