Research interests

My research interest is within the area of Management Control where I focus on how organizations can manage uncertainties. This includes topics such as Enterprise Risk Management, Beyond Budgeting, dynamic management control, performance management, use of forecasting and scenarios.

I use qualitative research methods and theories from social science to understand how organizations and actors manage uncertainties.

Publications / Working papers

- Meidell, A, Kaarbøe, K (2016). How enterprise risk management function influences decision-making in the organization – a field study of a non-financial company. *British Accounting Review*, in press.
